```java
1)class Fruits {
  public void Taste() {
    String taste = "Sweet";
    System.out.println(taste);
  }
}

class Apple extends Fruits {
  private String color = "Red";
  public static void main(String[] args) {
    Apple myApple = new Apple();
    myApple.Taste();
    System.out.println( myApple.color);
  }
}
```

```java
2)
class SCSE {
    public void Subjects() {
        System.out.println("Subjects:");
    }
}

class AIML extends SCSE {
    private String subject = "Fuzzy Logic";

    public void Subjects() {
        super.Subjects();
        System.out.println("AIML: " + subject);
    }
}

class CyberSecurity extends SCSE {
    private String subject = "Ethical Hacking";

    public void Subjects() {
        super.Subjects();
        System.out.println("CyberSecurity: " + subject);
    }
}

public class Main {
    public static void main(String[] args) {
        AIML aiml = new AIML();
        CyberSecurity cyberSecurity = new CyberSecurity();

        aiml.Subjects();
        cyberSecurity.Subjects();
    }
}
```
